E05	Analytics & BI	4 stories	Data + Engineering	Q2 2025

E01 — Pricing & Revenue Architecture

Implement Growth tier price increase to \$99, annual billing incentive, and pricing change communication flow.

US-01	Growth Tier Price Update	SP: 8	Must Have
As a Finance Director, I want to update the Growth tier price to \$99 per month in the billing system, so that all new Growth subscriptions are correctly billed at the new price point.			
Acceptance Criteria: ✓ New Growth subscription checkout shows \$99 ✓ Existing Growth accounts show legacy price until grace period ends ✓ Billing system audit log records price change with timestamp ✓ Zero billing errors in first 30-day post-go-live report			
RICE: 67500 Reach:500 Impact:3 Conf:90% Effort:2 BRD: BR-PR-01			
US-02	60-Day Grace Period Communication	SP: 5	Must Have
As a Marketing Manager, I want to send automated price change notification emails to all existing Growth customers with 60-day notice, so that customers are informed in advance and can choose to lock in annual billing at the legacy price.			
Acceptance Criteria: ✓ Email sent to 100% of active Growth accounts within 24 hours of announcement ✓ Email includes legacy price lock-in CTA with annual billing upgrade link ✓ Email open rate tracked and reported ✓ Unsubscribe rate monitored — alert if above 5%			
RICE: 57375 Reach:225 Impact:3 Conf:85% Effort:1 BRD: BR-PR-01			
US-03	Annual Billing Discount at Checkout	SP: 5	Should Have
As a Starter or Growth user, I want to see a clearly displayed 20% discount option for annual billing during subscription checkout, so that I can make an informed decision about annual vs monthly billing and save money by committing annually.			
Acceptance Criteria: ✓ Annual billing option displayed on pricing page and checkout ✓ Discount amount shown in dollars and percentage ✓ Annual billing selection saves to account immediately ✓ Confirmation email shows annual billing start and renewal date			
RICE: 84000 Reach:700 Impact:3 Conf:80% Effort:2 BRD: BR-PR-04			
US-04	Upsell Conversion Tracking	SP: 3	Should Have
As a CRO, I want to view a weekly dashboard showing Starter-to-Growth conversion funnel with stage-by-stage dropout rates, so that I can monitor the impact of feature gating and upgrade prompts on upsell performance.			
Acceptance Criteria: ✓ Dashboard shows: Starter active, feature limit hit, prompt shown, upgrade completed ✓ Conversion rate calculated at each funnel stage ✓ Week-on-week trend line displayed ✓ Dashboard accessible to CRO and CPO with export to PDF			
RICE: 400 Reach:5 Impact:3 Conf:80% Effort:3 BRD: BR-PR-05			

US-05	Price Change Landing Page	SP: 3	Could Have
As a existing Growth customer, I want to visit a dedicated landing page explaining the price change rationale and new features included, so that I understand the value I am receiving for the higher price and am less likely to churn.			
Acceptance Criteria: ✓ Landing page live before email send ✓ Page explains 3 new features included at \$99 ✓ Annual lock-in CTA prominent on page ✓ Page visits and CTA clicks tracked			
RICE: 15750 Reach:225 Impact:2 Conf:70% Effort:2 BRD: BR-PR-01			

US-06	Enterprise Pricing Page Update	SP: 3	Should Have
As a prospective Enterprise customer, I want to see AI features prominently listed as Enterprise-exclusive on the pricing page, so that I understand the premium value of the Enterprise tier and can justify the cost internally.			
Acceptance Criteria: ✓ Pricing page updated with AI features listed under Enterprise ✓ Beta label removed from all three AI features ✓ Enterprise tier described as including dedicated support and AI capabilities ✓ Pricing page A/B test variant tracked for conversion rate impact			
RICE: 30000 Reach:200 Impact:2 Conf:75% Effort:1 BRD: BR-PD-03			

E02 — Product Feature & Onboarding

Deliver structured 30-day onboarding, AI feature graduation, and feature adoption tracking for the product team.

US-07	30-Day Onboarding Sequence	SP: 8	Must Have
As a new NovaPulse account user, I want to receive a structured in-app onboarding guide that walks me through the top 5 core features in my first 30 days, so that I reach product value faster and am less likely to churn in months 1 to 3.			
Acceptance Criteria: ✓ Onboarding sequence triggers within 24 hours of account creation for 100% of new accounts ✓ Day 1: Task creation guide. Day 3: Project dashboard. Day 7: Collaboration features ✓ Progress tracker visible in-app showing onboarding completion percentage ✓ Accounts not completing Day 7 step flagged for CS outreach			
RICE: 34000 Reach:400 Impact:3 Conf:85% Effort:3 BRD: BR-PD-01			
US-08	AI Feature GA Launch — Enterprise	SP: 5	Should Have
As a Enterprise account administrator, I want to access AI Task Suggestions, Smart Deadline Predictor, and AI Meeting Notes Sync as fully released Enterprise features, so that my team benefits from AI-powered productivity tools that justify our Enterprise subscription cost.			
Acceptance Criteria: ✓ Beta label removed from all three AI features in Enterprise UI ✓ Features documented in help centre with usage guides ✓ Enterprise pricing page updated to list AI features ✓ Feature adoption tracked from launch day			
RICE: 13200 Reach:110 Impact:3 Conf:80% Effort:2 BRD: BR-PD-03			
US-09	Feature Adoption Dashboard — Product Team	SP: 5	Should Have
As a Chief Product Officer, I want to view a real-time dashboard showing weekly feature adoption rates by tier for all 40 product features, so that product prioritisation decisions are based on usage evidence rather than assumption.			
Acceptance Criteria: ✓ Dashboard shows usage count and adoption rate % for each feature by tier ✓ Week-on-week trend for each feature ✓ Alert when any feature drops 20% week-on-week ✓ Dashboard accessible to CPO and product managers. Exportable.			
RICE: 400 Reach:5 Impact:3 Conf:80% Effort:3 BRD: BR-PD-05			
US-10	Weekly Product Digest for Starter Users	SP: 3	Should Have
As a Starter tier user, I want to receive a weekly in-app and email digest showing Growth features I have not yet accessed with usage comparisons, so that I am aware of the additional value available in Growth tier and can make an informed upgrade decision.			
Acceptance Criteria: ✓ Digest sent every Monday to all active Starter accounts ✓ Shows top 3 Growth features by Growth tier usage volume ✓ Personalised message: Growth users use [feature] 3x more than your current usage ✓ Upgrade CTA included. Digest click-through rate tracked weekly			

RICE: 12375		Reach:165 Impact:2 Conf:75% Effort:2	BRD: BR-PD-04
US-11	Onboarding Completion Analytics	SP: 3	Could Have
As a Head of Customer Success, I want to view onboarding completion rates by cohort month and identify accounts that stalled at specific steps, so that I can prioritise CS outreach to accounts most at risk of early churn due to poor onboarding completion.			
Acceptance Criteria: ✓ Onboarding funnel dashboard shows completion rate at each step ✓ Accounts stalled at each step listed with account name and days since stall ✓ CS outreach logging — rep marks account as contacted within 48 hours of flag ✓ Month-on-month onboarding completion trend reported to CPO			
RICE: 350		Reach:5 Impact:2 Conf:70% Effort:2	BRD: BR-PD-01

E03 — Feature Gating & Upsell Conversion

Implement feature gating for 5 upsell trigger features and contextual upgrade prompts for Starter users.

US-12	Feature Gating Implementation	SP: 13	Must Have
As a Engineering Lead, I want to implement access controls that restrict full access to In-App Comments, Real-Time Notifications, Gantt Chart, Workflow Automation, and Custom Dashboards to Growth and Enterprise tier accounts, so that the feature gating architecture is technically sound and does not break existing Starter workflows.			
Acceptance Criteria: ✓ Gating active for all 5 designated features in production ✓ Starter users can view feature exists but full access returns upgrade prompt ✓ Existing Growth and Enterprise access unchanged ✓ Zero regression issues in Starter core PM features post-implementation			
RICE: 37800		Reach:700 Impact:3 Conf:90% Effort:5	BRD: BR-PR-03

US-13	Upgrade Prompt on Feature Gate	SP: 8	Must Have
As a Starter tier user, I want to see a clear and relevant upgrade prompt when I attempt to access a Growth-gated feature, so that I understand what I am missing and have a frictionless path to upgrade if I choose to.			
Acceptance Criteria: ✓ Prompt appears within 2 seconds of gated feature access attempt ✓ Prompt shows feature name, brief benefit description, and Growth tier price ✓ One-click upgrade button navigates directly to billing upgrade flow ✓ Prompt dismissible. Re-appears on next gated feature access. Impressions and conversions tracked			
RICE: 21037		Reach:165 Impact:3 Conf:85% Effort:2	BRD: BR-PD-02

US-14	Soft Usage Limit Notification	SP: 5	Must Have
As a Starter tier user, I want to receive a notification when I reach 80% of my feature usage allowance for gated features, so that I am prompted to consider upgrading before hitting a hard limit and experiencing frustration.			
Acceptance Criteria: ✓ Notification appears in-app at 80% usage threshold for any gated feature ✓ Notification message explains limit, current usage, and Growth tier benefit ✓ Notification dismissible but reappears in next session if limit not resolved ✓ Notification interactions tracked — dismiss rate and upgrade click rate reported weekly			
RICE: 13200		Reach:165 Impact:2 Conf:80% Effort:2	BRD: BR-PR-02

US-15	Upgrade Flow — Billing Integration	SP: 8	Must Have
As a Starter tier user, I want to complete an upgrade from Starter to Growth in fewer than 3 clicks from the upgrade prompt, so that the upgrade conversion process is frictionless and maximises the value of each upgrade intent.			
Acceptance Criteria: ✓ Upgrade flow: prompt → billing page → confirmation in maximum 3 steps ✓ Current payment method pre-filled if available ✓ Upgrade confirmation email sent within 5 minutes ✓ New Growth features accessible immediately upon upgrade completion			
RICE: 21037		Reach:165 Impact:3 Conf:85% Effort:2	BRD: BR-PR-01

US-16	Upgrade Prompt A/B Testing	SP: 3	Could Have
As a Product Manager, I want to configure and run A/B tests on upgrade prompt copy and design to optimise conversion rate, so that upgrade prompt messaging is continuously improved based on real conversion data.			
Acceptance Criteria: ✓ A/B test framework supports minimum 2 variant testing for prompt copy ✓ Traffic split configurable — default 50/50 ✓ Winner determined by upgrade conversion rate ✓ Results dashboard shows impressions, clicks, and conversion by variant			
RICE: 7150	Reach:165 Impact:2 Conf:65% Effort:3		BRD: BR-PD-02

E04 — Customer Support & Success

Implement tiered SLA model with priority queuing, CSAT tracking, and at-risk account identification.

US-17	Tiered Priority Queue Implementation	SP: 8	Must Have
As a Support Agent, I want to see all support tickets automatically sorted by tier priority in my agent dashboard — Enterprise first, then Growth, then Starter, so that high-value accounts receive faster responses and NovaPulse meets its SLA commitments by tier.			
Acceptance Criteria: ✓ Ticket queue sorted by tier priority automatically on submission ✓ Enterprise ticket appears at top of queue within 5 minutes ✓ Priority tier label visible on each ticket in agent view ✓ Manual override available for urgent Starter tickets with manager approval			
RICE: 180000		Reach:2000 Impact:3 Conf:90% Effort:3	BRD: BR-SP-01

US-18	SLA Timer and Alert System	SP: 8	Must Have
As a Support Manager, I want to see real-time SLA countdown timers on all open tickets and receive alerts when tickets approach SLA breach, so that I can intervene before SLA breaches occur and maintain compliance targets.			
Acceptance Criteria: ✓ SLA timer visible on each ticket showing time remaining ✓ Alert sent to manager at 75% of SLA time if ticket unresponded ✓ Breached tickets highlighted in red in agent dashboard ✓ Weekly SLA compliance report: target 90% compliance within 60 days of go-live			
RICE: 170000		Reach:2000 Impact:3 Conf:85% Effort:3	BRD: BR-SP-02

US-19	Post-Ticket CSAT Survey	SP: 8	Must Have
As a support ticket submitter, I want to receive an automated 5-point satisfaction survey within 1 hour of my ticket being closed, so that my feedback is captured and used to improve support quality and reduce churn risk.			
Acceptance Criteria: ✓ Survey sent within 1 hour of ticket closure for 100% of closed tickets ✓ 5-point scale with optional free text comment ✓ Results stored against account_id and plan_tier ✓ Weekly satisfaction score by tier reported to VP CS. Baseline established in first 30 days			
RICE: 255000		Reach:2000 Impact:3 Conf:85% Effort:2	BRD: BR-SP-04

US-20	At-Risk Account Flagging	SP: 8	Must Have
As a Customer Success Representative, I want to be automatically notified when any account raises 3 or more tickets within a 30-day period, so that I can proactively reach out before the account churns due to support frustration.			
Acceptance Criteria: ✓ At-risk flag triggers automatically when account reaches 3 tickets in 30 days ✓ CS rep receives in-app and email notification with account name and ticket summary ✓ Flag visible on account dashboard with risk level indicator ✓ CS outreach must be logged in system within 48 hours of flag			
RICE: 60000		Reach:500 Impact:3 Conf:80% Effort:2	BRD: BR-SP-06

US-21	Self-Service Knowledge Base	SP: 5	Should Have
As a NovaPulse user, I want to find answers to common product questions through a searchable in-app knowledge base without raising a support ticket, so that I resolve issues faster and support ticket volume is reduced freeing CS resources for complex issues.			
Acceptance Criteria: ✓ Knowledge base accessible from in-app help button ✓ Minimum 50 articles covering top 20 most-ticketed features at launch ✓ Search returns relevant results within 2 seconds ✓ Article helpfulness rating captured. Ticket deflection rate tracked. Target: 20% reduction in 6 months			
RICE: 240000	Reach:8000 Impact:2 Conf:75% Effort:5		BRD: BR-SP-05

E05 — Analytics & Business Intelligence

Deliver revenue dashboard, cohort monitoring, churn prediction inputs, and at-risk account reporting.

US-22	Real-Time Revenue Dashboard	SP: 8	Must Have
As a Chief Revenue Officer, I want to view a daily-updated revenue dashboard showing MRR by tier, ARR trajectory, and month-on-month growth, so that I have real-time visibility into revenue health and can act quickly when metrics diverge from targets.			
Acceptance Criteria: ✓ Dashboard shows MRR by tier with 12-month trend line ✓ ARR projection based on current MRR and historical growth rate ✓ Month-on-month MRR change highlighted — positive green, negative red ✓ Exportable to PDF. Accessible to CRO and Finance Director			
RICE: 450 Reach:5 Impact:3 Conf:90% Effort:3 BRD: BR-AN-01			
US-23	Cohort Retention Monitoring Dashboard	SP: 8	Must Have
As a Chief Product Officer, I want to view a monthly-updated cohort retention heatmap showing M1 M3 M6 M12 and M18 retention rates by signup cohort, so that I can identify underperforming cohorts early and trigger intervention before significant churn occurs.			
Acceptance Criteria: ✓ Cohort table updated on first day of each month ✓ Colour-coded heatmap — green high retention, yellow medium, red low ✓ At-risk cohort automatically flagged when M3 drops 5% below cohort average ✓ Tier-specific cohort views available — Starter, Growth, Enterprise tabs			
RICE: 425 Reach:5 Impact:3 Conf:85% Effort:3 BRD: BR-AN-02			
US-24	Weekly At-Risk Account Report	SP: 8	Must Have
As a Customer Success Team Lead, I want to receive an automatically generated weekly report every Monday identifying accounts with declining usage or rising ticket volume, so that my team prioritises outreach to accounts most likely to churn in the next 30 days.			
Acceptance Criteria: ✓ Report generated and delivered every Monday by 9am ✓ Accounts ranked by composite risk score: usage trend 40%, ticket volume 30%, CSAT 30% ✓ Top 20 at-risk accounts listed with account name, tier, risk score, and last CS contact date ✓ CS team marks accounts as reviewed by Tuesday. Compliance tracked			
RICE: 637 Reach:5 Impact:3 Conf:85% Effort:2 BRD: BR-AN-04			
US-25	LTV and LTV to CAC Dashboard	SP: 3	Should Have
As a Finance Director, I want to view monthly LTV and LTV to CAC ratio by tier in a finance dashboard, so that I can assess the unit economics of each pricing tier and validate the business case for pricing changes.			
Acceptance Criteria: ✓ LTV calculated monthly as tier price divided by monthly churn rate ✓ LTV:CAC ratio displayed by tier with month-on-month trend ✓ Alert triggered when LTV:CAC falls below 3:1 for any tier ✓ Dashboard accessible to CFO and CRO. Exportable to Excel
