1. EXECUTIVE SUMMARY

This Business Requirements Document defines the functional and non-functional requirements for NovaPulse's Product Analytics and Monetisation Strategy initiative. It translates the analytical findings from the NovaPulse-BA engagement into actionable, testable requirements that the product and engineering teams can implement.

The requirements are organised across four domains: Pricing and Revenue Architecture, Product and Feature Capabilities, Customer Support and Success, and Analytics and Business Intelligence. All requirements are MoSCoW prioritised and linked to specific acceptance criteria to enable UAT validation.

Business Driver: Analysis of 5,000 subscription records and 600 churn events identified that features (19%), support (17.3%), and budget (17.3%) are the top three churn drivers. Implementing these requirements is projected to deliver +\$56,673 ARR uplift in Year 1 and reduce monthly churn loss from \$1,110 to below \$800 within 6 months.

Scope Statement: This BRD covers requirements for pricing restructure, feature gating, onboarding improvements, support SLA model, and analytics capability. It does not cover infrastructure changes, third-party integrations beyond those specified, or requirements outside the 12-month roadmap horizon.

2. BUSINESS OBJECTIVES

Obj ID	Business Objective	Success Metric	Owner
BO-01	Increase ARR by minimum 10% within 12 months through pricing restructure and upsell optimisation	ARR reaches \$590,000 within 12 months	CRO
BO-02	Reduce monthly MRR churn loss from \$1,110 to below \$800 within 6 months	Monthly churn loss report shows below \$800	CRO + VP CS
BO-03	Increase Starter to Growth upsell conversion from 8% to 12% within 6 months	Upsell funnel dashboard shows 12% conversion	CPO + Marketing

BO-04	Improve Growth tier satisfaction score from 3.9 to 4.2 within 90 days	CSAT dashboard shows Growth average 4.2	VP CS
BO-05	Establish cohort monitoring to detect at-risk accounts before M6	Cohort dashboard live with automated alerts	Data + CS
BO-06	Position AI features as Enterprise differentiator to support \$229 pricing in Q4 2025	AI features listed on Enterprise pricing page	CPO

3. STAKEHOLDER REGISTER

ID	Stakeholder	Title	Primary Concern	RACI
S01	Chief Revenue Officer	CRO	ARR growth, churn reduction, pricing decisions	Approve
S02	Chief Product Officer	CPO	Product roadmap, feature priorities, build decisions	Approve
S03	Head of Customer Success	VP CS	Churn signals, CSAT, at-risk accounts	Consult
S04	Finance Director	CFO	Revenue model accuracy, business case ROI	Review
S05	Engineering Lead	Head of Eng	BRD feasibility, backlog sizing, technical constraints	Implement
S06	Head of Marketing	VP Marketing	Acquisition channel, upsell messaging	Inform
S07	Sales Director	VP Sales	Pricing objections, upsell conversation	Inform

4. BUSINESS REQUIREMENT - PRICING AND REVENUE ARCHITECTURE

Context

Pricing analysis identified that Growth tier price increase from \$79 to \$99 with feature gating delivers +\$56,673 ARR. Feature gating drives upsell conversion from Starter. Annual billing incentive reduces churn exposure. These requirements implement the Scenario 2 recommendation from Monetisation_Strategy doc.

BR-PR-01 — Growth Tier Price Update

MoSCoW: Must Have

Owner: CRO + Finance

Gap Reference: G01 Related User Story: US-01, US-02

Requirement: The system shall support a Growth tier price point of \$99 per month for all new subscriptions from the go-live date.

Acceptance Criteria:

- New Growth subscription checkout displays \$99 as the monthly price
 - Existing Growth customers continue to be billed at \$79 for the 60-day grace period
 - After the grace period, existing Growth customers are automatically migrated to \$99 unless they have selected annual billing lock-in
 - Billing system audit log records the price change event with timestamp, actor, and before and after values
 - Zero billing discrepancies in the first 30-day post-go-live audit report
-

BR-PR-02 — 60-Day Grace Period Communication

MoSCoW: Must Have

Owner: Marketing + CRO

Gap Reference: G01

Related User Story: US-02

Requirement: The system shall trigger an automated email communication to all active Growth customers notifying them of the price change with a minimum of 60 days notice before the new price takes effect.

Acceptance Criteria:

- Email sent to 100% of active Growth accounts within 24 hours of price change announcement
 - Email clearly states the new price, the effective date, and the option to lock in annual billing at the current price
 - Annual billing lock-in CTA links directly to the billing upgrade flow
 - Email open rate and CTA click rate tracked and reported to Marketing
 - If unsubscribe rate exceeds 5% an alert is sent to VP Marketing within 24 hours
-

BR-PR-03 — Feature Gating for Upsell Trigger Features

MoSCoW: Must Have

Owner: CPO + Engineering

Gap Reference: G02 Related

User Story: US-12, US-13, US-14

Requirement: The system shall restrict full access to the following five features for Starter tier accounts and display an upgrade prompt when a Starter user attempts to access them: In-App Comments and Mentions, Real-Time Notifications (full functionality), Gantt Chart View, Workflow Automation Rules, Custom Dashboards (full functionality).

Acceptance Criteria:

- All five designated features are inaccessible in full for Starter tier accounts from go-live date
- Starter users can see that the feature exists in the navigation or UI but cannot access full functionality
- A read-only preview or limited version is available for Starter users to demonstrate value

- An upgrade prompt appears within 2 seconds of a Starter user attempting to access a gated feature
 - Existing Growth and Enterprise account access to all five features is unchanged
 - Zero regression issues reported in Starter core PM features in the 30 days following implementation
-

BR-PR-04 — Upgrade Prompt Component

MoSCoW: Must Have

Owner: CPO + Engineering

Gap Reference: G04

Related User Story: US-13

Requirement: The system shall display a contextual upgrade prompt when a Starter user encounters a feature gate, containing the feature name, a brief description of the benefit, the Growth tier price, and a one-click upgrade CTA.

Acceptance Criteria:

- Prompt displays the name of the specific gated feature the user attempted to access
 - Prompt includes a one-sentence benefit description for the feature
 - Prompt displays the Growth tier price of \$99 per month
 - A single click on the upgrade CTA navigates the user directly to the billing upgrade flow with Growth tier pre-selected
 - Prompt is dismissible with a single click
 - Prompt reappears on the next session if the user dismisses without upgrading
 - All prompt impressions, dismissals, and upgrade clicks are tracked as distinct events in the analytics system
-

BR-PR-05 — Annual Billing Discount

MoSCoW: Should Have

Owner: CRO + Finance

Gap Reference: G03

Related User Story: US-03

Requirement: The system shall display a 20% discount option for annual billing on the pricing page and during subscription checkout for all tiers.

Acceptance Criteria:

- Annual billing option is displayed alongside monthly billing on the pricing page
 - The discount amount is shown in both dollar value and percentage
 - Annual billing selection is saved to the account immediately on confirmation
 - A confirmation email is sent within 5 minutes showing the annual billing start date and renewal date
 - The annual discount is correctly applied to all billing calculations with no discrepancy
-

BR-PR-06 — Upsell Conversion Tracking

MoSCoW: Should Have

Owner: CPO + Data

Gap Reference: G04

Related User Story: US-04

Requirement: The system shall track and display Starter-to-Growth conversion funnel metrics on a weekly basis covering all stages from active Starter account through to upgrade completion.

Acceptance Criteria:

- Funnel stages tracked: Starter active, feature limit reached, upgrade prompt shown, upgrade CTA clicked, upgrade completed

- Conversion rate displayed between each adjacent funnel stage
 - Week-on-week trend line shown for each stage conversion rate
 - Dashboard accessible to CRO and CPO
 - Exportable to PDF for executive reporting
 - Baseline conversion rate established in first 14 days of go-live
-

5. BUSINESS REQUIREMENTS — PRODUCT AND FEATURES

Context

Features is the number one churn driver at 19% of all 600 churn events. Onboarding gaps are visible in M1 to M6 retention decay. AI features rank 12th of 40 by usage despite being in beta — there is strong organic demand that is not being commercially exploited.

BR-PD-01 — 30-Day Onboarding Sequence

MoSCoW: Must Have

Owner: CPO + CS

Gap Reference: G06

Related User Story: US-07

Requirement: The system shall trigger a structured 30-day onboarding programme for all new accounts that guides users through the top five core product features with in-app tutorials and progress tracking.

Acceptance Criteria:

- Onboarding sequence triggers automatically within 24 hours of account creation for 100% of new accounts
- Day 1 step covers task creation and assignment
- Day 3 step covers project dashboard navigation
- Day 7 step covers collaboration features including comments and notifications
- Day 14 step covers reporting features
- Day 30 step covers integrations and advanced settings

- An in-app progress tracker shows the user their onboarding completion percentage at all times
 - Any account that has not completed the Day 7 step is automatically flagged for CS outreach
 - Onboarding completion rate is tracked by cohort month and reported to CPO monthly
-

BR-PD-02 — Upgrade Prompt from Weekly Digest

MoSCoW: Should Have

Owner: CPO + Marketing

Gap Reference: G04

Related User Story: US-10

Requirement: The system shall send a weekly in-app notification and email to all active Starter accounts showcasing the top three Growth tier features by usage volume with personalised usage comparisons and an upgrade CTA.

Acceptance Criteria:

- Digest sent every Monday to 100% of active Starter accounts
 - Shows the top three Growth features by Growth tier usage volume that week
 - Includes a personalised comparison message showing the difference between Growth user average usage and the recipient's usage for each featured capability
 - Upgrade CTA is included and links directly to the billing upgrade flow
 - Weekly digest click-through rate and upgrade conversion rate are tracked and reported
 - Users can opt out of the digest — opt-out rate monitored and reported monthly
-

BR-PD-03 — AI Feature GA Launch

MoSCoW: Should Have

Owner: CPO + Engineering

Gap Reference: G05, G08

Related User Story: US-06, US-08

Requirement: The system shall graduate AI Task Suggestions, Smart Deadline Predictor, and AI Meeting Notes Sync from beta status to General Availability, positioning all three as Enterprise tier exclusive features.

Acceptance Criteria:

- Beta labels removed from all three features in the product UI on go-live date
 - All three features are accessible only to Enterprise tier accounts
 - Enterprise pricing page updated to list all three AI features as exclusive capabilities
 - Help centre articles published for all three features before go-live
 - Feature adoption rate tracked by tier from go-live day
 - No regression in existing Enterprise account functionality following the release
-

BR-PD-04 — Feature Adoption Dashboard

MoSCoW: Should Have

Owner: CPO + Data

Gap Reference: G15

Related User Story: US-09

Requirement: The system shall provide a product team dashboard showing weekly active usage rates by feature and tier for all 40 product features, with automated alerts for significant adoption changes.

Acceptance Criteria:

- Dashboard refreshes with weekly data every Monday

- Shows usage count and adoption rate percentage for each of the 40 features by tier
 - Four-week trend line displayed for each feature
 - Automated alert triggered when any feature drops 20% or more in week-on-week usage
 - Dashboard accessible to CPO and all product managers
 - Exportable to CSV for further analysis
-

BR-PD-05 — Role-Based Permissions for Enterprise

MoSCoW: Could Have

Owner: CPO + Engineering

Gap Reference: G07

Related User Story: US-16 (adapted)

Requirement: The system shall allow Enterprise account administrators to configure custom role-based permissions at the feature level for their team members.

Acceptance Criteria:

- Role-based permission editor accessible to Enterprise admin users only
 - Minimum five custom role types supported
 - Permission changes applied to all affected users within 60 seconds
 - All permission changes logged in the audit trail with timestamp and actor
 - No Starter or Growth account can access the permission configuration interface
-

6. BUSINESS REQUIREMENTS — CUSTOMER SUPPORT AND SUCCESS

Context

Support is the top Starter churn reason and second largest Growth churn driver. Enterprise resolution time is 36.9 hours. First response averages 87 to 89 minutes across all tiers with no differentiation. Growth satisfaction is 3.9 out of 5 — the lowest of all tiers. These are the most operationally correctable churn drivers in the entire dataset.

BR-SP-01 — Tiered Priority Queue Priority: Must Have MoSCoW: Must Have Owner: VP CS + Engineering Gap Reference: G09 Related User Story: US-17

Requirement: The support ticketing system shall automatically sort and route all incoming tickets by account tier with Enterprise tickets receiving the highest routing priority, followed by Growth, followed by Starter.

Acceptance Criteria:

- All incoming tickets are automatically tagged with the account tier on submission
- Enterprise tickets appear at the top of the agent queue within 5 minutes of submission
- Growth tickets are visible in the queue within 15 minutes of submission
- Starter tickets are visible in the queue within 30 minutes of submission
- The tier priority label is visible on every ticket in the agent dashboard view
- A manager override allows urgent Starter tickets to be manually escalated with approval logged

BR-SP-02 — First Response SLA Enforcement Priority: Must Have MoSCoW: Must Have Owner: VP CS Gap Reference: G09 Related User Story: US-18

Requirement: The system shall enforce first response time SLA targets by tier and send automated alerts when tickets are approaching their SLA deadline without a response.

Acceptance Criteria:

- SLA timer starts automatically on ticket submission for all tickets
 - Enterprise SLA target is 30 minutes for first response
 - Growth SLA target is 60 minutes for first response
 - Starter SLA target is 120 minutes for first response
 - An automated alert is sent to the support manager when a ticket reaches 75% of its SLA time without a first response
 - SLA breaches are logged and included in the weekly SLA compliance report
 - SLA compliance target is 90% for all tiers within 60 days of go-live
-

BR-SP-03 — Resolution Time SLA Enforcement Priority: Must Have MoSCoW: Must Have Owner: VP CS Gap Reference: G09 Related User Story: US-18

Requirement: The system shall track resolution time from first response for all tickets and enforce resolution SLA targets by tier.

Acceptance Criteria:

- Resolution SLA tracking begins from the time of first agent response
 - Enterprise resolution SLA target is 24 hours
 - Growth resolution SLA target is 48 hours
 - Starter resolution SLA target is 72 hours
 - Automatic escalation is triggered when a ticket reaches 80% of its resolution SLA time unresolved
 - Resolution SLA compliance is reported weekly to VP CS
 - Target 90% resolution SLA compliance for all tiers within 60 days of go-live
-

BR-SP-04 — Post-Ticket CSAT Survey Priority: Should Have MoSCoW: Should Have Owner: VP CS Gap Reference: G10 Related User Story: US-19

Requirement: The system shall automatically send a customer satisfaction survey to the ticket submitter within one hour of every ticket being marked as resolved.

Acceptance Criteria:

- Survey is sent within one hour of ticket closure for 100% of closed tickets
 - Survey uses a 5-point scale with an optional free-text comment field
 - Survey responses are stored against the account ID and plan tier for segmented reporting
 - Weekly satisfaction score by tier is automatically reported to VP CS every Monday
 - A baseline satisfaction score is established in the first 30 days of go-live
 - Satisfaction score trend by tier is visible in the support analytics dashboard
-

BR-SP-05 — At-Risk Account Flagging Priority: Should Have MoSCoW: Should Have Owner: VP CS + Data Gap Reference: G10 Related User Story: US-20

Requirement: The system shall automatically identify and flag accounts that raise three or more support tickets within any rolling 30-day period and notify the assigned customer success representative.

Acceptance Criteria:

- At-risk flag triggers automatically when an account reaches three tickets in a rolling 30-day window
 - The assigned CS representative receives both an in-app notification and an email notification containing the account name, tier, number of tickets, and a summary of the most recent ticket subject
 - The at-risk flag is visible on the account dashboard with a risk level indicator
 - The CS representative must log an outreach action within 48 hours of the flag being raised
 - Compliance with the 48-hour outreach requirement is tracked and reported to VP CS weekly
-

BR-SP-06 — Self-Service Knowledge Base Priority: Should Have MoSCoW: Should Have
Owner: VP CS + Engineering Gap Reference: G11 Related User Story: US-21

Requirement: The system shall provide a searchable self-service knowledge base accessible from within the product containing a minimum of 50 articles covering the most frequently reported support issues.

Acceptance Criteria:

- Knowledge base is accessible from an in-app help button visible on all product pages
 - A minimum of 50 articles are published at launch covering the top 20 most-ticketed feature areas
 - Search functionality returns relevant results within 2 seconds
 - Each article includes a helpfulness rating that users can submit with a single click
 - Article helpfulness scores and search query data are reviewed monthly to identify gaps
 - Ticket deflection rate is tracked weekly with a target of 20% ticket volume reduction within 6 months of launch
-

7. BUSINESS REQUIREMENTS — ANALYTICS AND BUSINESS INTELLIGENCE

Context

No cohort monitoring, churn prediction, or real-time revenue dashboard currently exists. H2 2024 cohorts contain 953 subscriptions in December alone with unknown M12 retention. The two anomalous cohorts identified in this engagement — 2024-05 at 58.0% M18 retention and 2024-11 at 55.7% M15 retention — were only discovered through retrospective analysis. A live monitoring system would have detected these in real time.

BR-AN-01 — Real-Time Revenue Dashboard

MoSCoW: Must Have

Owner: Data + Finance

Gap Reference: G14

Related User Story: US-22

Requirement: The system shall provide a daily-updated revenue dashboard displaying MRR by tier, ARR trajectory, and month-on-month growth rate accessible to the CRO and Finance Director.

Acceptance Criteria:

- Dashboard refreshes with previous day's data every morning by 8am
 - MRR is displayed by tier — Starter, Growth, Enterprise — with a 12-month rolling trend line
 - ARR projection is calculated based on current MRR and the three-month average growth rate
 - Month-on-month MRR change is highlighted green for positive and red for negative
 - Dashboard is accessible to the CRO and Finance Director
 - Dashboard is exportable to PDF for board reporting
 - Data accuracy is validated monthly against the billing system source of truth
-

BR-AN-02 — Cohort Retention Monitoring Dashboard

MoSCoW: Must Have

Owner: Data + CPO

Gap Reference: G12

Related User Story: US-23

Requirement: The system shall provide a monthly-updated cohort retention heatmap displaying M1, M3, M6, M12, and M18 retention rates by signup cohort with automated alerts for underperforming cohorts.

Acceptance Criteria:

- Cohort table is updated on the first day of each calendar month
 - Retention rates are colour-coded — green for high retention, yellow for medium, red for low — using the same scale as the NovaPulse-BA analysis heatmap
 - An automated alert is triggered and sent to CPO and VP CS when any cohort's M3 retention drops 5% or more below the rolling cohort average
 - Tier-specific cohort views are accessible as separate tabs — Starter, Growth, Enterprise
 - Dashboard is accessible to CPO, VP CS, and CRO
 - Historical cohort data is retained for minimum 36 months
-

BR-AN-03 — LTV and LTV to CAC Dashboard

MoSCoW: Should Have

Owner: Data + Finance

Gap Reference: G14

Related User Story: US-25

Requirement: The system shall calculate and display monthly LTV and LTV to CAC ratio by tier with trend analysis and automated alerts when the ratio falls below threshold.

Acceptance Criteria:

- LTV is calculated monthly as tier price divided by monthly churn rate for that tier
 - LTV to CAC ratio is displayed by tier with a 6-month trend line
 - An automated alert is sent to the CRO and CFO when LTV to CAC falls below 3:1 for any tier
 - Dashboard is accessible to CFO and CRO
 - Data is exportable to Excel for financial modelling
-

BR-AN-04 — Weekly At-Risk Account Report

MoSCoW: Should Have

Owner: Data + CS

Gap Reference: G13

Related User Story: US-24

Requirement: The system shall generate and deliver an automated weekly report every Monday identifying accounts showing declining feature usage, increasing support ticket volume, or below-average satisfaction scores.

Acceptance Criteria:

- Report is generated automatically every Monday and delivered to the CS team lead by 9am
 - Accounts are ranked by a composite risk score calculated as: feature usage trend weighted at 40%, ticket volume weighted at 30%, satisfaction score weighted at 30%
 - The top 20 at-risk accounts are listed with account name, plan tier, risk score, and last CS contact date
 - CS team members are required to mark accounts as reviewed in the system by Tuesday
 - Compliance with the Tuesday review requirement is tracked and reported to VP CS
 - Risk score methodology is documented and reviewed quarterly for accuracy
-

BR-AN-05 — Upgrade Funnel Analytics

MoSCoW: Should Have

Owner: Data + CPO

Gap Reference: G04, G15

Related User Story: US-04

Requirement: The system shall track upgrade funnel conversion rates at each stage from Starter active account through to upgrade completion and make this data available to the product team in a weekly dashboard.

Acceptance Criteria:

- The following funnel stages are each tracked as distinct events: Starter account active, feature gate encountered, upgrade prompt displayed, upgrade prompt CTA clicked, billing page reached, upgrade payment completed
 - Conversion rate is calculated and displayed between each adjacent funnel stage
 - Week-on-week trend is shown for each stage conversion rate
 - Dashboard is accessible to CPO and CRO
 - Baseline conversion rates are established within the first 14 days of go-live
 - Any stage showing a week-on-week conversion drop of 20% or more triggers an automated alert to CPO
-

8. NON-FUNCTIONAL REQUIREMENTS

NFR ID	Category	Requirement	MoSCoW
NFR-01	Performance	All dashboard pages shall load within 3 seconds on a standard broadband connection	Must Have
NFR-02	Performance	The upgrade prompt shall appear within 2 seconds of a gated feature access attempt	Must Have
NFR-03	Reliability	System uptime shall be a minimum of 99.5% measured monthly excluding scheduled maintenance windows	Must Have
NFR-04	Security	All billing and subscription changes shall require re-authentication via two-factor authentication for Enterprise accounts	Must Have
NFR-05	Security	Audit logs shall capture all permission changes, billing updates, and admin actions with timestamp and user ID	Must Have
NFR-06	Scalability	The system shall support ten times current subscription volume without performance degradation	Should Have
NFR-07	Accessibility	All in-app notifications and upgrade prompts shall meet WCAG 2.1 AA accessibility standards	Should Have
NFR-08	Data Retention	Churn event and feature usage data shall be retained for a minimum of 36 months to support cohort analysis	Should Have
NFR-09	Integration	The analytics dashboard shall integrate with the existing billing system via API with a maximum 24-hour data lag	Should Have
NFR-10	Localisation	Pricing shall be displayed in the user account currency where applicable with USD as the default	Could Have

9. CONSTRAINTS AND ASSUMPTIONS

Constraints

ID	Category	Constraint
C01	Budget	The tiered support SLA model must be implemented without additional headcount — priority queuing configuration only
C02	Timeline	The Growth price increase must go live with a minimum 60-day customer notice period before the new price takes effect
C03	Technical	Feature gating must be implemented without breaking or removing any existing Starter account workflows or currently accessible features
C04	Legal	Existing Growth customers on annual contracts cannot have their price increased mid-contract term
C05	Data	All analytics requirements must comply with GDPR and applicable data protection regulations in all operating territories

Assumptions

ID	Assumption
A01	The billing system supports tier-based pricing updates without requiring a full re-architecture of the subscription management layer
A02	The support ticketing system supports priority queue configuration based on account attribute values
A03	Feature usage tracking infrastructure already captures events at the individual feature level with sufficient granularity for adoption reporting
A04	Engineering capacity is available to implement feature gating within Q1 2025 sprint cycles without displacing other committed roadmap items
A05	The marketing team can execute the price change communication campaign within a two-week lead time from announcement decision

10. ACCEPTANCE CRITERIA SUMMARY

AC ID	Domain	Acceptance Criterion
AC-01	Pricing	New Growth subscriptions billed at \$99 from go-live. Zero billing errors in first 30-day post-go-live report
AC-02	Pricing	Feature gating active for all 5 designated features. Starter users see upgrade prompt within 2 seconds of gated access attempt
AC-03	Pricing	Annual billing discount of 20% correctly applied to all annual subscriptions. Discount visible at checkout
AC-04	Product	30-day onboarding sequence triggers for 100% of new accounts within 24 hours of signup
AC-05	Product	In-app upgrade prompt shown to Starter users at gated feature access. Conversion rate tracked from day 1
AC-06	Product	AI features removed from beta label in Enterprise tier. Enterprise pricing page updated before go-live
AC-07	Support	Enterprise tickets appear in priority queue within 5 minutes. Growth within 15 minutes. Starter within 30 minutes
AC-08	Support	First response SLA compliance above 85% for all tiers within 30 days of go-live
AC-09	Support	CSAT survey sent within 1 hour of all ticket closures. Results linked to account tier
AC-10	Analytic s	Revenue dashboard live and accessible. MRR by tier accurate within 24-hour data lag
AC-11	Analytic s	Cohort retention table updated monthly. At-risk cohort alert triggers when M3 drops 5% below average
AC-12	Analytic s	At-risk account report delivered to CS team every Monday by 9am

11. REQUIREMENTS TRACEABILITY MATRIX

Req ID	Gap Reference	Description	User Story	Accept Criteria	Test Cases	Priority
BR-PR-01	G01	Growth price \$99	US-01	AC-01	TC-01 to TC-03	Critical
BR-PR-02	G01	Grace period comms	US-02	AC-01	TC-04 to TC-05	Critical
BR-PR-03	G02	Feature gating	US-12	AC-02	TC-06 to TC-09	Critical
BR-PR-04	G02	Upgrade prompt	US-13	AC-02	TC-10 to TC-12	Critical
BR-PR-05	G03	Annual billing	US-03	AC-03	TC-13 to TC-14	High
BR-PR-06	G04	Upsell tracking	US-04	AC-05	TC-15	High
BR-PD-01	G06	Onboarding sequence	US-07	AC-04	TC-16 to TC-18	Critical
BR-PD-02	G04	Weekly digest	US-10	AC-05	TC-19	High
BR-PD-03	G05, G08	AI GA launch	US-06, US-08	AC-06	TC-20	High
BR-PD-04	G15	Feature adoption dashboard	US-09	AC-10	TC-21	High
BR-PD-05	G07	Role-based permissions	US-16	AC-02	TC-22	Medium
BR-SP-01	G09	Tiered priority queue	US-17	AC-07	TC-23 to TC-24	Critical
BR-SP-02	G09	First response SLA	US-18	AC-08	TC-25 to TC-26	Critical

BR-SP-03	G09	Resolution time SLA	US-18	AC-08	TC-27	Critical
BR-SP-04	G10	CSAT survey	US-19	AC-09	TC-28	High
BR-SP-05	G10	At-risk flagging	US-20	AC-09	TC-29	High
BR-SP-06	G11	Knowledge base	US-21	AC-08	TC-30	High
BR-AN-01	G14	Revenue dashboard	US-22	AC-10	TC-31 to TC-32	Critical
BR-AN-02	G12	Cohort monitoring	US-23	AC-11	TC-33 to TC-34	Critical
BR-AN-03	G14	LTV dashboard	US-25	AC-10	TC-35	High
BR-AN-04	G13	At-risk report	US-24	AC-12	TC-36	High
BR-AN-05	G04, G15	Upgrade funnel analytics	US-04	AC-05	TC-37	High
