

NovaPulse SaaS Product Analytics & Monetisation Strategy

ARTIFACT 2 - STAKEHOLDER REGISTER & POWER/INTEREST MATRIX

DOCUMENT CONTROL

Field	Detail
Document Title	Stakeholder Register - NovaPulse
Version	1.0
Status	Active
Author	Abinesh
Date Created	04/05/2026
Related Artefact	Project Charter v1.0

1. PURPOSE

This register identifies all stakeholders with a material interest in the NovaPulse Product Analytics & Monetisation Strategy engagement. It documents each stakeholder's role, influence level, primary concern, engagement approach, and communication frequency. The Power/Interest Matrix provides a visual classification used to prioritise engagement effort throughout the project lifecycle.

2. STAKEHOLDER REGISTER

 Novapulse - Stakeholder Register Doc

3. POWER/INTEREST MATRIX

4. ENGAGEMENT APPROACH BY QUADRANT

Quadrant	Stakeholders	Strategy
Manage Closely	CRO, CPO	Maximum engagement. These two approve your recommendations. Every major output is reviewed with them before finalising. Their concerns shape your prioritisation.
Keep Satisfied	CFO, Board	High power, lower day-to-day interest. They care about financial accuracy and ARR impact. Engage at key milestones with clean, quantified outputs. Never surprise them.

Keep Informed	VP CS, Eng Lead, Marketing, Sales, Analyst	Actively interested but limited authority. Brief them regularly — their field knowledge validates your findings. Sales and CS in particular will tell you things the data cannot.
Monitor	End Users (Starter tier)	Represented indirectly through churn data and feedback_text. No direct engagement — but every recommendation must ultimately serve their needs or it will fail in the market.

5. KEY STAKEHOLDER CONCERNS MAPPED TO PROJECT ARTEFACTS

Stakeholder	Their Core Question	Artefact That Answers It
CRO	What is churn costing us in ARR and how do we stop it?	Cohort Churn Analysis + Monetisation Strategy + ARR Dashboard
CPO	Which features drive retention and what should we build next?	Feature Adoption Analysis + Product Roadmap + BRD
VP CS	Which accounts are at highest churn risk right now?	Churn Driver Analysis + Support Ticket Correlation
CFO	What is the projected ROI of each pricing scenario?	Pricing Tier Optimisation Model + Business Case in BRD
Eng Lead	What are we actually being asked to build and in what order?	BRD + Agile Backlog + UAT Plan

Sales	Where is the upgrade opportunity and what objections will we face?	Pricing Scenario Model + Feature Adoption by Tier
Board	What is the 12-month ARR impact of this strategy?	Executive Presentation — slide 11
